Jobangebot Text

Software Architect Enterprise Java (m/f)

Premier business and IT consulting and services company - Ref.Nr.: 5265

Our client is one of the leading independent information technology and business process services companies with 27,000 employees all around the world. Launching operations in Germany since 1990, the company has earned a solid reputation for high-quality services. The experienced and dynamic professionals help clients to design, implement and operate highly-effective IT and business environments, including systems integration and consulting, technology management, managed application services and business process services. Through these services, you'll have access to a wealth of tools and opportunities to build your skills set and career.

Responsibilities:

As Software Architect (m/f) you work with the program-level solution architect to define and evolve the e-Commerce platform's overall solution architecture. In particular, taking responsibility for Enterprise Java-centric software architecture concerns: working with Enterprise Java-knowledgeable resources to ensure best use and interoperability of ATG and Enterprise Java technologies. Furthermore you work with development teams to make effective implementation and design decisions as well as promote the software architecture. The e-Commerce team is continuously growing and is currently seeking ambitious individuals (m/f) to strengthen the business unit.

Required Skills:

- § Degree in Information Technology or comparable practical experience
- § Several years of Enterprise Java (Java EE / J2EE) development, design, and software architecture experience required
- § Significant experience as a lead developer, lead designer, or software architect is required
- § E-commerce / e-business experience is extremely valuable
- § Experience in agile software development is extremely valuable (*required* if no prior e-commerce / e-business experience)
- § Application integration experience is extremely valuable (*required* if no prior e-commerce / e-business or telecommunications / internet services industry experience)
- § Experience in the telecommunications or internet services industry is extremely valuable
- § German language skills beneficial, but not mandatory
