Jobangebot Text

The Information Network Officer will contribute to enhance the secretariat headquarters and conference network infrastructure, to improve security and increase network availability, flexibility and resilience, and to implement the Record Management/Enterprise Content Management System.

We are looking for a person who meets the following requirements:

University degree in Computer science or related technical field.

Certifications in Cisco technologies or any other related network technology

At least five (5) years experience in Networking and in particular: Routing, switching, LAN, VLANS, VoIP, among others.

Knowledge in routing protocols like BGP, EIGRP, RIP, OSPF.

Hands on experience in various IOS packages like Cisco.

Fluency in English, ability to write and speak in German. Working knowledge of another UN language an asset.

Applications are requested on-line. Please refer to announcement 09/TA02/IS on the UNFCCC vacancy page>
